- Upright positionable Bit-Checks convince due to their functionality in a minimum of space
- Particularly for wood applications
- Rapidaptor holder for rapid bit change
- Torsion design against premature wear

Robust Bit-Check by Wera. Bit-Checks provide a quick overview of the tools available. Bits not needed are simply reinserted into the set and do not get lost. Simple transportation e.g. in the shirt pocket. Includes universal holder with ring magnet – which very securely holds even heavy screws – and Rapidaptor, which allows bits to be attached without any need to actuate the sleeve. Can be inserted in the power screwdriver or for use in the chuck of the electric drill. Multi-component Bit-Check that can be positioned upright for permanently secure bit storage.

At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

Torsion bits

Torsion bits absorb the damaging peak torque loads in the torsion zone. This prevents premature wear and enhances the service life of the bits.

Tough-absorbing bits

Tough-absorbing Wera bits (Z) prevent any premature breakage of the drive tip.

Rapidaptor with ring magnet

The floating, free-turning magnetic sleeve securely holds even large and heavy screws to enable immediate application. There is no need to hold the screw when applying the tool – something which can be dangerous and painful. Also ideal for overhead work.
